At a glance

IBM® Cognos® Integration Server V10.1 and IBM Cognos Command Center® V10.1 complement the IBM technology leadership in performance management and business intelligence solutions by providing access to a variety of specialized data sources and a self-service user experience, enabling data integration and automation to be simple, fast, reliable, and secure.

Cognos Integration Server is a data bridge that:

- Bridges from Oracle Essbase, Oracle Hyperion Financial Management, and Oracle Hyperion Planning applications to IBM DB2® , Oracle RDBMS, Microsoft™ SQL Server, and text file output.
- Enables Oracle Hyperion data to be used with a variety of performance management processes, reporting applications, and data warehouses.

Cognos Command Center enables business users to automate processes across their business applications by:

- Automating complex tasks across multiple computing environments and applications.
- Offering plug-ins supporting essential business processes such as automated data reconciliation and business intelligence applications such as performance management and Oracle Hyperion.

Cognos Integration Server and Cognos Command Center are each available in a Starter Edition and a Standard Edition.

Overview

IBM Cognos Integration Server V10.1 and IBM Cognos Command Center V10.1 are based upon Star Analytics' software products. The software helps address the cross-enterprise challenge to integrate and automate a hybrid mix of applications and heterogeneous business analytics information.

IBM Cognos Integration Server extracts and moves data into data warehouses and repositories for use with performance management and business intelligence applications. It supports a variety of data sources, including, but not limited to:

- Oracle Essbase

- Oracle Hyperion Planning and
- Oracle Hyperion Financial Management

IBM Cognos Command Center introduces simplicity and control by enabling business users to automate processes across their business applications. The product:

- Enables self-service automation allowing business users to view and run business processes on an ad-hoc basis.
- Provides an interface designed for business users that supports mobility.
- Centralizes automation processes providing insight and control of who ran what, where, when, and how.

Key prerequisites

- Data repositories running supported levels of Oracle Essbase, Oracle Hyperion Financial Management, or Oracle Hyperion Planning

Planned availability date

- May 17, 2013: Electronic delivery
- June 14, 2013: Media packs

Availability of programs with encryption algorithm in France is subject to French government approval.

Description

IBM Cognos Integration Server V10.1 and IBM Cognos Command Center V10.1 help you integrate and automate your business analytics and data. They can offer value by:

- Enabling you in ways that may save you time, cost, and resources required to maintain and update disparate systems with manual methods or multiple integration tools.
- Enabling sustainable and agile systems for your finance or performance management process owners.

IBM Cognos Integration Server

IBM Cognos Integration Server extracts and moves data into data warehouses and repositories for use with performance management and business intelligence applications. Cognos Integration Server supports a variety of data sources, including, but not limited to, Oracle Essbase, Oracle Hyperion Planning, and Oracle Hyperion Financial Management.

IBM Cognos Integration Server Starter Edition includes the following components:

- Base Server
- Oracle Essbase Aggregate Storage and Block Storage (ASO and BSO) Enablement
- Oracle Hyperion Planning Enablement
- Oracle Hyperion Financial Management (HFM) Enablement
- Text Target Enablement

IBM Cognos Integration Server Standard Edition includes all Cognos Integration Server Starter Edition components plus the following:

- RDBMS Target Enablement

Highlights of IBM Cognos Integration Server:

- Single-source reporting: Oracle Essbase, Oracle Hyperion Planning, and Oracle Hyperion Financial Management internally generate complex and proprietary calculated and derived data sets. If you have a single-source reporting strategy, Cognos Integration Server extracts this data into other business intelligence applications or relational databases, either directly or via intermediate text files.
- Automated data warehouse: High-performance extraction of data from isolated application-specific Hyperion data marts is enabled to create and update a star schema inside a centralized data warehouse.
- 24 x 7 availability: While remaining online for users, Cognos Integration Server can provide near real-time extractions on a continuous basis to update external reporting applications and for backup purposes.

IBM Cognos Integration Server non-production editions mirror the components of the corresponding production editions. Connection entitlements are not required for non-production editions. A trade-up option is available from the Starter Edition to the Standard Edition, and from the Starter Non-Production Edition to the Standard Non-Production Edition. Refer to the Passport Advantage® trade-up section for details.

IBM Cognos Command Center

IBM Cognos Command Center allows business users to automate and orchestrate complex tasks across multiple computing environments and applications while reducing the need for complex and brittle custom code. The product provides an interface designed for business users that supports mobility and can be run from desktops, web interfaces, or smartphones. IBM Cognos Command Center includes plug-ins that support performance management and Oracle Hyperion environments. High availability for automatic failover in production environments is available by purchasing additional entitlement to the Cognos Command Center for each production environment.

IBM Cognos Command Center Starter Edition includes the following components:

- Base Server
- All plug-ins
- Command Line Option
- Unlimited processes (formerly tasks)

IBM Cognos Command Center Standard Edition includes all Cognos Command Center Starter Edition components plus the following:

- Event Listener Option
- Web Services Option

Highlights of IBM Cognos Command Center :

- Automation across multiple platforms: Automates across hybrid computing environments and applications that coexist on-premise and in the cloud.
- Workflow orchestration: Sequences tasks across computing platforms and applications.
- Reduces custom automation code: Plug-ins that support performance management and Oracle Hyperion environments reduce the need for complex application interfaces, custom coding, and IT resources.
- Control and compliance: Provides an audit trail to see who ran what, where, when, and how.
- Automation lifecycle management: Provides source control and audit history among development, test and production environments.
- Self-service automation: Authorized business users can have on-demand access to the processes they need to control.

- **Mobility and flexibility:** Automations can be run and monitored from smartphone browsers to support a mobile workforce.

IBM Cognos Command Center non-production editions mirror the components of the corresponding production editions. Connection entitlements are not required for non-production editions. A trade-up option is available from the Starter Edition to the Standard Edition, and from the Starter Non-Production Edition to the Standard Non-Production Edition. Refer to the Passport Advantage trade-up section for details.

Accessibility by people with disabilities

Product positioning

IBM Cognos Integration Server and IBM Cognos Command Center complement the IBM technology leadership in performance management and business intelligence solutions by providing access to a variety of specialized data sources and a self-service user experience, enabling data integration and automation to be simple, fast, reliable, and secure.

Cognos Integration Server is a fast and reliable method of sourcing specialized cube data (information that is generally stored in a specialized format requiring specialization to extract) across financial, sales, and operational applications from a variety of data sources, including, but not limited to, Oracle Essbase, Oracle Hyperion Planning, and Oracle Hyperion Financial Management.

Cognos Command Center allows business users to automate and orchestrate complex tasks across multiple computing environments and applications while reducing the need for complex and brittle custom code. The product provides an interface designed for business users that supports mobility and can be run from desktops, web interfaces, or smartphones.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries, free of charge.

Technical information

Specified operating environment

Hardware requirements

- Command line or web-enabled devices running supported levels of Microsoft Windows™
- Data repositories running either Microsoft SQL Server 2005, or later, or Oracle 9.2.0.1, or later
- For IBM Cognos Command Center , smartphone devices running:
 - Apple iOS
 - Blackberry OS5, or later
 - Android OS
- For only IBM Cognos Integration Server Oracle Essbase Extractor, devices running:
 - Solaris 9 or 10

- IBM AIX® V6.1 or V7.1
- HP-UX 11.x
- Red Hat Linux™ Base Server 5.3
- For IBM Cognos Integration Server, the minimum disk space is 5 MB for the command line interface and up to 200 MB for other functions. The recommended disk space is 1 GB, or greater.
- For IBM Cognos Integration Server, the minimum memory is 256 MB for the command line interface and up to 1 GB for other functions. The recommended memory is 4 GB, or greater.
- For IBM Cognos Command Center , the minimum disk space is 5 MB for the command line interface and up to 200 MB for other functions. The recommended disk space is 1 GB, or greater.
- For IBM Cognos Command Center , the minimum memory is 256 MB for the command line interface and up to 1 GB for other functions. The recommended memory is 1 GB, or greater.

Software requirements

Cognos Integration Server:

- **Operating system**
 - Microsoft Windows 2003 Server (x86, x86-64)
 - Microsoft Windows 2003 Server R2 (x86 , x86-64)
 - Microsoft Windows 7 (x86, x86-64)
 - Microsoft Windows 2008 Server (x86, x86-64)
 - Microsoft Windows 2008 Server R2 (x86, x86-64)
- **Third-party software**
 - Java™ Runtime Environment 1.5, or later. Certain functions may require Java Runtime Environment 1.6, or later.
 - Microsoft .NET Framework 4.0, or later. Certain functions may require Microsoft .NET Framework 2.0.
- **Source databases**
 - Oracle Essbase 7.1.2, or later
 - Oracle Hyperion Financial Management 4.0, or later
 - Oracle Hyperion Planning 4.0, or later
- **Target databases**
 - Oracle 9i - 9.2.0.1, or later, and Oracle Client Interface (OCI)
 - Microsoft SQL Server 2005, and Microsoft Data Access Components 2.8, or later
 - IBM DB2 9.1, or later
- **Application repository**
 - Oracle 9i - 9.2.0.1, or later
 - Microsoft SQL Server 2005, or later with Microsoft Data Access Components 2.8, or later
 - SQLite
- When installing and running IBM Cognos Integration Server installation on Windows 7, choose "Run as administrator".
- IBM Cognos Integration Server Satellite Server is used for data and metadata extractions from Oracle Hyperion Financial Management.
- In addition to the Microsoft Windows platforms listed above, the IBM Cognos Integration Server Oracle Essbase Extractor is supported on the following UNIX™ platforms: Oracle Sun Solaris 9 and 10 SPARC, IBM AIX V6.1 and V7.1, HP-UX 11.x Itanium™ or PA RISC, and Red Hat Enterprise Linux Base Server 5.3 (compatible).

- IBM Cognos Integration Server requires Microsoft .NET Framework. Customers must acquire a license for Microsoft .NET Framework separately.

Cognos Command Center :

- **Operating system**
 - Microsoft Windows 2003 Server (x86, x86-64)
 - Microsoft Windows 2003 Server R2 (x86, x86-64)
 - Microsoft Windows 2008 Server (x86, x86-64)
 - Microsoft Windows 2008 Server R2 (x86, x86-64)
- **Administrative client**
 - Microsoft Windows 2003 Server (x86, x86-64)
 - Microsoft Windows 2003 Server R2 (x86, x86-64)
 - Microsoft Windows 2008 Server (x86, x86-64)
 - Microsoft Windows 2008 Server R2 (x86, x86-64)
- **Command line interface**
 - Microsoft Windows 2003 Server (x86, x86-64)
 - Microsoft Windows 2003 Server R2 (x86, x86-64)
 - Microsoft Windows 2008 Server (x86, x86-64)
 - Microsoft Windows 2008 Server R2 (x86, x86-64)
- **Third-party software**
 - Java Runtime Environment 1.6, or later
 - Microsoft .NET Framework 4.0, or later
- **Agent**
 - Microsoft Windows 2003 Server (x86, x86-64)
 - Microsoft Windows 2003 Server R2 (x86, x86-64)
 - Microsoft Windows 2008 Server (x86, x86-64)
 - Microsoft Windows 2008 Server R2 (x86, x86-64)
 - Oracle Sun Solaris 9 and 10 SPARC
 - IBM AIX V6.1 and V7.1
 - HP-UX 11.x Itanium or PA RISC
 - Red Hat Enterprise Linux Server Base Server 5.3 (compatible)
 - Ubuntu 11.x, or later
- **Web server** - Internet Information Services (IIS) 6.0, or later with ASP.NET enabled
- **Web browser, web client**
 - Microsoft Windows Internet Explorer 7.x, or later
 - Mozilla Firefox 17 and Firefox ESR 17, or later on Microsoft Windows and Apple OS X
 - Apple Safari 6.0, or later on Microsoft Windows and Apple OS X
 - Google Chrome 3.0, or later
- **Application repository**
 - Oracle 9i - 9.2.0.1, or later and Oracle Client Interface (OCI)
 - Microsoft SQL Server 2005, or later Microsoft Data Access Components 2.8, or later

Note: IBM Cognos Command Center requires Microsoft .NET Framework 4.0, or later. Customers must acquire a license for Microsoft .NET Framework separately.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM , such as an announcement

letter. Documentation and other program content may be supplied only in the English language.

Companion products

IBM Cognos TM1 (5724-W49) with Turbo Integrator - Cognos Integration Server can provide a purpose-built data integration platform that facilitates the movement of your data and metadata from existing environments to the Cognos TM1 environment, reducing the time it takes you to get to market with the implementation, as well as reducing the internal data validation time normally required when moving data between environments. Coupled with Cognos Command Center scheduling capabilities, the automation of your data migration process can also be accomplished.

Limitations

For additional information, refer to the license information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

IBM Electronic Support

The IBM Support Portal is your gateway to technical support. This includes IBM Electronic Support tools and resources, for software and hardware, to help save time and simplify support. The Electronic Support tools can help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems through the Service Request online tool, and build skills. All these tools are made available through your IBM support agreement, at no additional charge.

Planning information

Installability

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express® . Product upgrades and technical support are provided by the Software Subscription and Support (Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Cognos Integration Server and IBM Cognos Command Center are available on DVD and via electronic download.

IBM Cognos Integration Server media packs are distributed with the following:

- IBM Cognos Integration Server 10.1 DVDs
- IBM International Program License Agreement and its License Information in multiple languages

The License Information form number is L-NNAF-95SQDK.

IBM Cognos Command Center media packs are distributed with the following:

- IBM Cognos Command Center 10.1 DVDs
- IBM International Program License Agreement and its License Information in multiple languages

The License Information form number is L-NNAF-95T4V8.

Security, auditability, and control

IBM Cognos Integration Server and IBM Cognos Command Center use the security and auditability features of the host hardware and software system. The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Global Technology Services

Contact your IBM representative for the list of selected services available in your country, either as standard or customized offerings for the efficient installation, implementation, or integration of this product.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Connection

Connection is a unit of measure by which the program can be licensed. A connection is a link or association of a database, application, server, or any other type of device to the program. Licensee must obtain entitlements for the total number of connections which have been or are made to the program.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage . It is not available as shrinkwrap.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

If the program license is designated as "non-production", the program can only be deployed as part of the licensee's internal development and test environment for internal non-production activities, including but not limited to testing, performance tuning, fault diagnosis, internal benchmarking, staging, quality assurance activity and/or developing internally used additions or extensions to the program using published application programming interfaces. Licensee is not authorized to use any part of the program for any other purposes without acquiring the appropriate production entitlements. Connection entitlements are not required for non-production editions.

License Information form number

- IBM Cognos Integration Server: L-NNAF-95SQDK
- IBM Cognos Command Center : L-NNAF-95T4V8

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of three years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified,

via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Other terms

Volume orders (IVO)

No

IBM International Passport Advantage Agreement

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Usage restriction

Yes. For additional information, refer to the License Information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Software Subscription and Support applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

Not applicable.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

IBM Electronic Services

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support all at no additional cost to you.

Now integrated into the base operating system of AIX V5.3, AIX V6.1, and AIX V7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM, which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type `smitty esa_main`, and select `Configure Electronic Service Agent`. In addition, ESA now includes a powerful Web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more

information and documentation on how to configure and use Electronic Service Agent , refer to

<http://www.ibm.com/support/electronic>

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

Benefits

Increased uptime: The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the symptoms, diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean no more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

Security: The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM . The Electronic Service Agent tool securely transmits either via the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide customers a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into a customer's system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by the customer and IBM . The customer's business applications or business data is never transmitted to IBM .

More accurate reporting: Since system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, customers are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM , problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

Customized support: Using the IBM ID entered during activation, customers can view system and support information in the My Systems and Premium Search sections of the Electronic Support website at

<http://www.ibm.com/support/electronic>

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent . Reports are available for any system associated with the customer's IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, customers are able to see search results that apply specifically to their systems.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.
