IBM^(R) wants to help you make the most of your data by making it easy to deploy that data wherever it is needed, fluidly adapting to your changing needs, and allowing for integration of multiple platforms, languages and workloads. IBM subscribes to "data without limits".

Clients with existing entitlements to the Db2^(R) Workgroup Server Edition will receive a corresponding number of entitlements to the Db2 Standard Edition. For some clients, these entitlement ratios will potentially not be sufficient to cover the current set of Db2 deployments. For these clients, contact an IBM representative to ensure the correct number of entitlements for your current deployments as of April 30, 2019 are fully licensed.

Effective June 4, 2019, IBM will withdraw from marketing part numbers from the following programs licensed under the IBM International Program License Agreement:
